

Our School Improvement Plan Priorities for 2015-2016 are:

1.	Implement the new Climbing Frames system so that all staff are assessing without levels and so that assessment is in line with the Primary Curriculum
2.	Provide further opportunities to develop spoken language across the curriculum so that pupils can speak with confidence in different situations, and can apply this to their written work in order to ensure improvements in writing (L5 = 28%) in the 2016 Y6 SATs
3.	Develop pupils' independence by providing further opportunities for the development of thinking skills and the use of practical resources so that the school achieves the floor targets for reading, writing and maths (85%)

Our Subject Development Plan Priorities for 2015-2016 are:

4.	Develop teaching and learning in Creative Arts across the school so that staff are more confident to teach all aspects of Art and DT and resources are available to provide memorable learning experiences for the children
5.	Embed the new Computing curriculum to ensure there is a consistent and progressive approach to the teaching of computing across the school
